

# Design

Design performs over two hundred dates per year. In order to keep it fresh for you and ourselves, we constantly add new songs to our already large repertoire. We love to play all styles of music with the greatest respect for the original artists. Special made dance discs for the intermissions will keep your guests in motion - no break in the music - no break in the mood - no break in the party! You are always welcome to use our sound system for announcements, toasts, roasts and award presentations.

#### Instrumentation:

Manny Keller - A founding member of Design, Manny has played drums for over 25 years, all over America, Europe and Asia. His strong dynamic beat and production skills can be also heard on many recordings.

Karin Kopp - Karin has all the "basses" covered. She also plays guitar, keyboards and is one of the lead vocalists for Design.

Tracy Stone - Tracy is always ready for any crowd. His singing and entertainment talent reaches all ages. With hilarious impersonations, lovable enthusiasm, and high energy, he gets everyone on the dance floor and screaming for more.

Steve Payne - Steve plays the guitar and sings. This guy knows every song ever written and when he's not performing with Design, he produces many CD projects.
